INTERNATIONAL APPLICATION PUBLISHED UNDER THE PATENT COOPERATION TREATY (PCT)

(51) International Patent Classification 6 : C12Q 1/00, G01N 33/573, 33/53, 33/567, 24/00	A1	(11) International Publication Number: WO 00/11208 (43) International Publication Date: 2 March 2000 (02.03.00)
(21) International Application Number: PCT/US99/19415 (22) International Filing Date: 25 August 1999 (25.08.99) (30) Priority Data: 60/097,788 25 August 1998 (25.08.98) US 60/099,113 3 September 1998 (03.09.98) US (71) Applicant: UNIVERSITY OF WASHINGTON [US/US]; Office of Technology Transfer, Suite 200, 1107 NE 45th Street, Seattle, WA 98105 (US). (72) Inventors: AEBERSOLD, Rudolf, Hans; 8609 SE 78th Street, Mercer Island, WA 98040 (US). GELB, Michael H.; 6203 34th Avenue NE, Seattle, WA 98115 (US). GYGI, Steven, P.; 5844 NE 75th Street A211, Seattle, WA 98115 (US). SCOTT, C., Ronald; 4815 Pullman Avenue NE, Seattle, WA 98105 (US). TURECEK, Frantisek; 7001 29th Avenue NE, Seattle, WA 98115 (US). GERBER, Scott, A.; 7264 27th Avenue NE, Seattle, WA 98115 (US). RIST, Beate; 1146 16th Avenue East, Seattle, WA 98112 (US). (74) Agents: SULLIVAN, Sally, A. et al.; Greenlee, Winner and Sullivan, P.C., Suite 201, 5370 Manhattan Circle, Boulder, CO 80303 (US).		(81) Designated States: AU, JP, European patent (AT, BE, CH, CY, DE, DK, ES, FI, FR, GB, GR, IE, IT, LU, MC, NL, PT, SE). Published <i>With international search report.</i>
(54) Title: RAPID QUANTITATIVE ANALYSIS OF PROTEINS OR PROTEIN FUNCTION IN COMPLEX MIXTURES (57) Abstract <p>Analytical reagents and mass spectrometry-based methods using these reagents for the rapid, and quantitative analysis of proteins or protein function in mixtures of proteins. The methods employ affinity labeled protein reactive reagents having three portions: an affinity label (A) covalently linked to a protein reactive group (PRG) through a linker group (L). The linker may be differentially isotopically labeled, e.g., by substitution of one or more atoms in the linker with a stable isotope thereof. These reagents allow for the selective isolation of peptide fragments or the products of reaction with a given protein (e.g., products of enzymatic reaction) from complex mixtures. The isolated peptide fragments or reaction products are characteristic of the presence of a protein or the presence of a protein function in those mixtures. Isolated peptides or reaction products are characterized by mass spectrometric (MS) techniques. The reagents also provide for differential isotopic labeling of the isolated peptides or reaction products which facilitates quantitative determination by mass spectrometry of the relative amount of proteins in different samples. The methods of this invention can be used for qualitative and quantitative analysis of global protein expression profiles in cells and tissues, to screen for and identify proteins whose expression level in cells, tissue or biological fluids is affected by a stimulus or by a change in condition or cell state of the cell, tissue or organism from which the sample originated.</p> <p>This is the cover sheet only. The entire International Publication (116 pages) was filed with the Patent Office and incorporated into the disclosure.</p>
